Do you battle with allergies to dust or have asthma? Is your bedding asthma and allergy friendly?

One lucky person will receive some help from Smart Silk in the form of TWO of their standard size pillows! These pillows are comfy and simply fantastic for those of us (like Powered by Mom) who suffer from allergies and asthma. Read on to find out more and of course enter the giveaway.

Open to US & Canada

Did you know? We never sleep alone. We spend about a third of our lives in bed and that bed is a haven for dust mites. In fact, duvets, mattresses and pillows are the home to millions of dust mites because of the warm and humid environment that allows them to dine on human skin flakes. Um yuck right? Well Smart Silk a Montreal, Quebec company wants to help us with our allergies and asthma with their all natural bedding. They are the first and only all natural bedding to be certified asthma & allergy friendly™ by the Asthma and Allergy Foundation of America and the Asthma Society of Canada.

I suffer from allergies from pollen, cats and the thing I'm allergic to the most why dust of course. I was absolutely thrilled to hear about Smart Silk pillows as it sounded like it was exactly what I needed! On top of having allergies I also have knee problems and a few other joint issues due to arthritis. I mention this because as a result of it I tend to sleep with lots of pillows, one under my knees which was recommended by a physiotherapist and if my wrists are sore one for my wrists. Well for the knees in particular not any pillow will do, can't have one that is rigid it needs to mold to my knees for a few reasons but comfort is the top reason. So even though I'm allergic to down the only pillows I found that worked were down pillows. Not any more my wonderful Smart Silk pillow which has all the softness of down but still keeps its shape is perfect for that! I use my other pillow for my head of course and it's so incredibly comfortable. It supports my head but as mentioned unlike down pillows that lose their shape (doesn't bounce back into shape after you take the weight off it) my Smart Silk pillow keeps its shape. It molds to my neck and shoulders nicely when I sleep on it and goes back to its shape when I don't.

I love what I have learned about these pillows! Not only are they certified to be chemical free, fire retardant and made with all natural SmartSilk™ silk fill they are also resistant to mold & mildew and will not retain odors! Love that especially since I'm also allergic to mold and I'm very sensitive to smells. These are definitely the pillows for me!

My husband keeps trying to steal my Smart Silk pillows as they are so comfortable but I've told him hands off he doesn't have allergies and they're mine 😊. Below is a picture of one of the pillows I received, doesn't it look comfy?

Overall Powered by Mom gives the Smart Silk pillow 5 out of 5 stars for excellent quality, comfort and being perfect for those of us who suffer from allergies and asthma and well for anyone who wants a comfortable pillow that is made from natural materials. It does not get better than that!
